● **Leather Sofas by Living in Style:** Made with the finest Italian leather, 100% full grain, that maintains the natural markings of the hides, and preserves the natural beauty of the leather and ensuring that it is protected for daily use (Price on request).

● **Wall clock By IDUS:** A stylish wall clock with copper leaves and walnut centre will draw attention for its innovativeness. (Price on request).

● **Living Room Essentials**

- First and foremost, it is essential to check the dimension of your room. Now, choose the furniture you want to fit and make a pencil sketch/ layout to scale. Focus on the architecture because if the envelope or the basic layout is right, there is no way to get the right design. Focus on dead corners to see how they can be utilized. Ventilation and air- conditioning must be primarily positioned.
- Choose your furniture as this consumes the bulk of your floor area. Every object has height, depth and width so innovative combination will add visual interest to the space. Create a focal point which can either be a wall décor, a console with a mirror, a fireplace or a painting.
- Once the furniture has been decided, choose a colour to paint your walls. A neutral colour palette is the safest choice. Depending on the décor style, you can add wall paper, wall art or an accent wall. If you like to experiment, you can add a punch of bright colours or bold patterns by graphic printing or stenciling. The ceiling as a thumb rule should be white.
- Lighting transforms the feeling about your place. It can make a place look safe and comfortable as well as dramatic. The fundamental is to combine general, task and accent lighting according to function and style.
- Accessories are the soul of any living room. A layered rug, timeless curtains, an impact mirror, a statement art piece, and luxurious holiday collectables are all invited in living room. The personal touch to living room is what gives it a character.
